About Online Clipboard

Online Clipboard is a free online tool that helps you to copy and paste data between devices. This tool comes with a live clipboard synchronization feature. You can also use auto delete clipboard feature to destroy clipboard after viewing them once. When you send data to an online clipboard you can retrieve it on another device in many ways (by scanning QR code, opening generated link, by entering your id)

This online clipboard is created for short-term text sharing. It operates publicly, allowing anyone to access your text by entering a 4-digit pin. If you wish to share text permanently and secure, we recommend using our online notepad instead.

Features of Online Clipboard

Our online clipboard comes with many amazing features:

- Live clipboard synchronization
- Auto destroy clipboard after viewing
- Send text to online clipboard instantly
- Use ID to retrieve online clipboard
- Use camera to scan qr code and open clipboard

What is clipboard?

The clipboard is a buffer that some operating systems provide for short-term storage and transfer within and between application programs. The clipboard is usually temporary and unnamed, and its contents reside in the computer's RAM. Read more about clipboard at [Wikipedia.com](https://en.wikipedia.org/wiki/Clipboard)
